Agenda

- Definitions
- nApps modeling
- nApps example

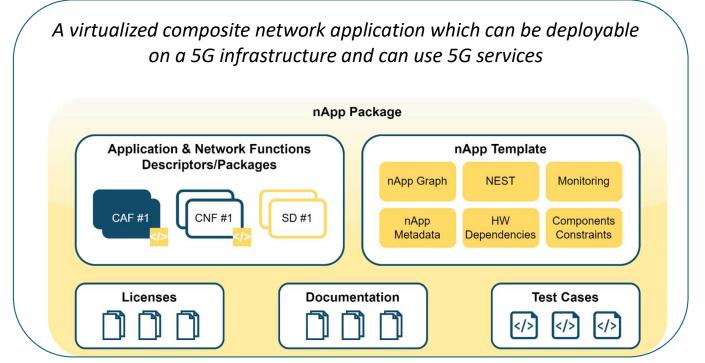

- Atomic component (AF/NF)
- Network Application (nApp)
- Vertical Service

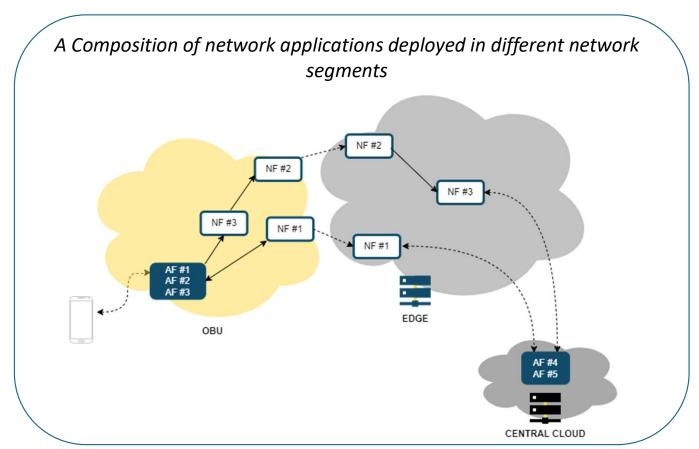

- Atomic component (AF/NF)
- Network Application (nApp)
- Vertical Service

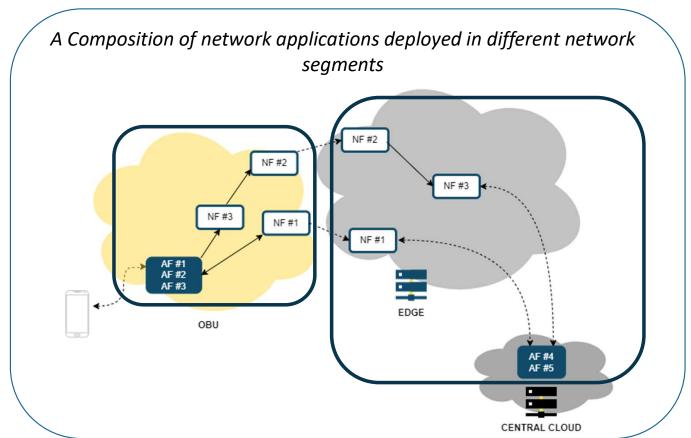

5G I A N A

- Atomic component (AF/NF)
- Network Application (nApp)
- Vertical Service

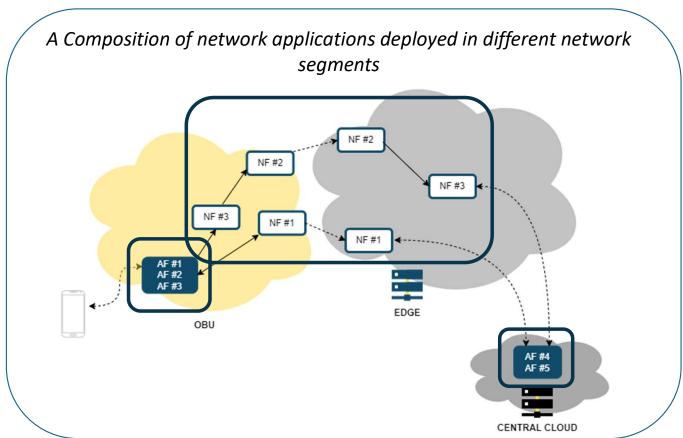

- Atomic component (AF/NF)
- Network Application (nApp)
- Vertical Service

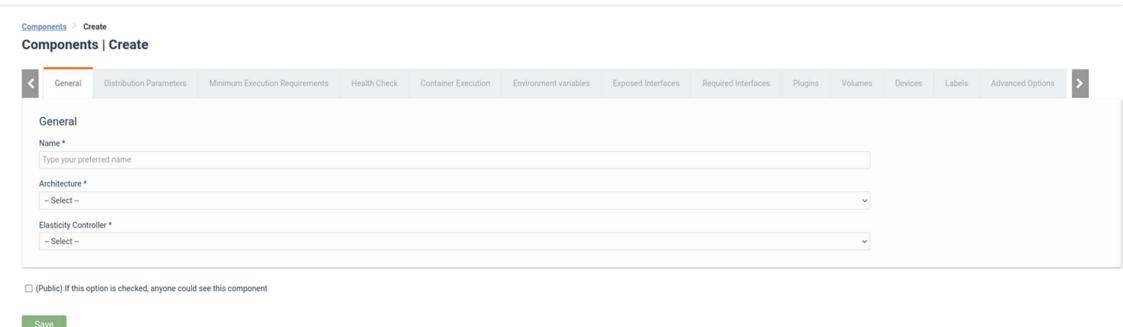

- Atomic component (AF/NF)
- Network Application (nApp)
- Vertical Service

nApp composing process. Adding Components (1/4)

Add Atomic Component: General information

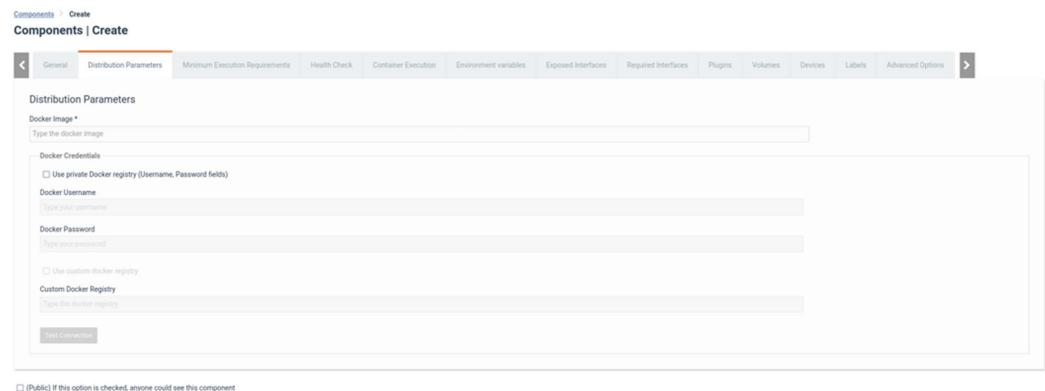

3/15/2023 5G-IANA – Info Day

nApp composing process. Adding Components (2/4)

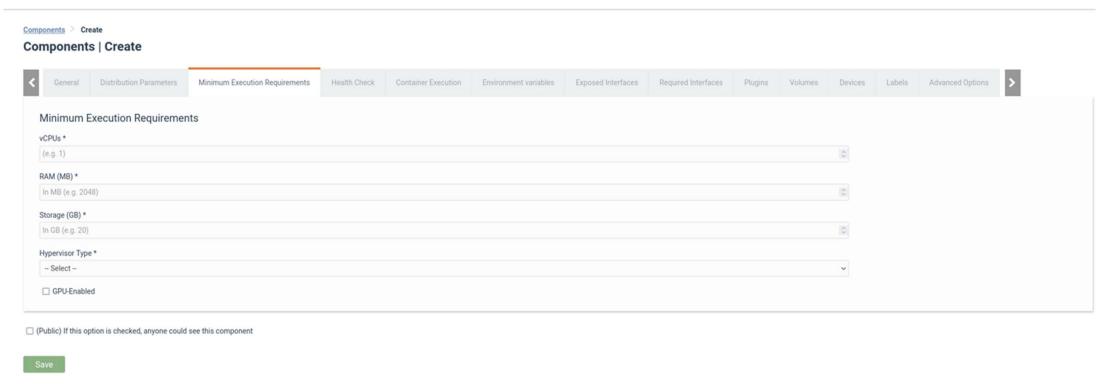

Add Atomic Component: Docker image parameters

nApp composing process. Adding Components (3/4)

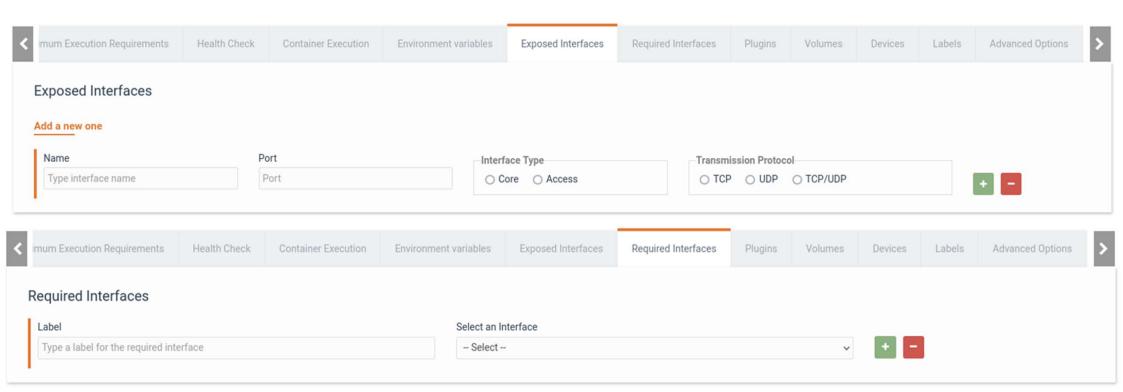

Add Atomic Component: Minimum Execution Requirements

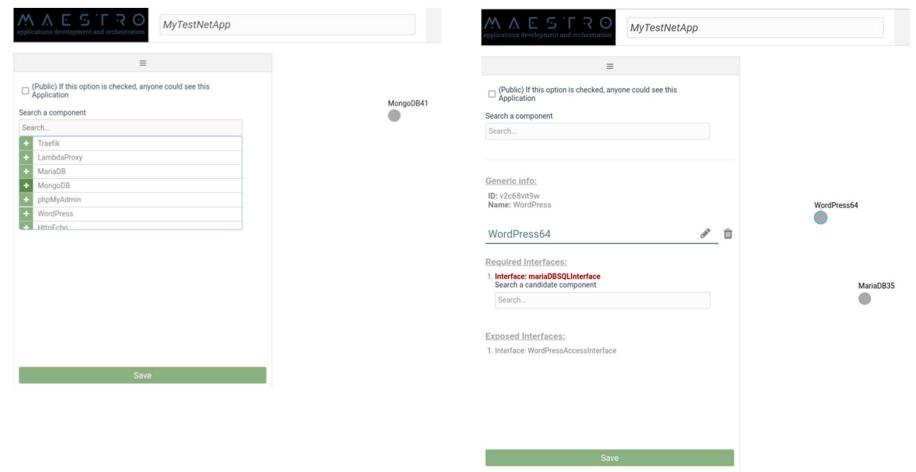

nApp composing process. Adding Components (4/4)

Add Atomic Component: Exposed and Required Interfaces

nApp composing process. Linking components (1/3)

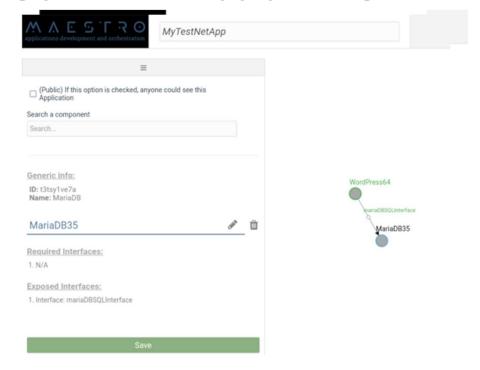

nApp composing process. Linking components (2/3)

(Public) If this option is checked, anyor Application Search a component Search			
Generic Info; ID: t3tsy1ve7a Name: MariaDB			WordPress64
MariaDB35	d ^a	û	MariaDB35
Required Interfaces; 1. N/A			
Exposed Interfaces; 1. Interface: mariaDBSQLInterface			
Save			

nApp composing process. nApp package

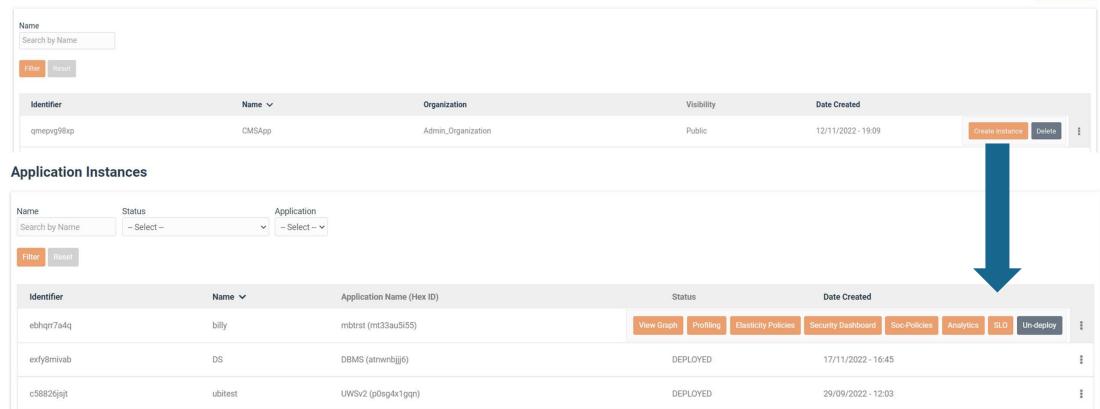

- Build of nApp package - Commit of the nApp package to 5G-IANA Gitlab
 - Execution of CI/CD pipeline to onboard the nApp package
 - Onboard the nApp package on the nApp catalogue

Onboard nApp

nApp provisioning

Applications

nApp for automotive vertical service (1/2)

Internal Endoint Application Function 5G Endoint nApp Network Function "Starter-kit" External Endoint **EDGE HW Dependency** Third.party Application Function **EDGE** Uu C-ITS message communication 5G Core Vehicle Access ETSI Decentralized nApp Enviromental "Starter-kit" **Notification Service** OBU ETSI Decentralized Events Relevance Queue Warning Event Enviromental Detection Autonomous Driving Uu C-ITS message Roadside Camera Module Interface communication Interface OBU side (UEs) **EDGE** side /2023

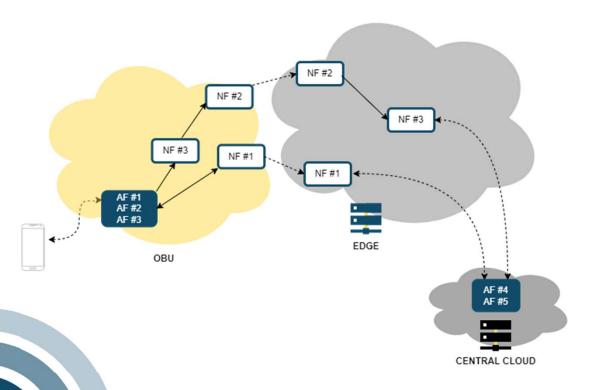

5G-IANA – Info Day

nApp for automotive vertical service (2/2)

UC5 Real-time Road network risk assessment

Atomic Component	Interfaces
AF#1 Position and time service	AF#2, AF#3, mobile phone
AF#2 Hazardous event receiver and display	AF#1, AF#3, mobile phone
AF#3 Hazardous driving behaviour detection	AF#1, A#2, mobile phone
AF#4 Elastic Search Service	AF#5
AF#5 Log Reporting Service	AF#4
NF#1 Uu data communication	AF#1, AF#2, AF#3
NF#2 C-ITS messages communication	NF#3
NF#3 ETSI Decentralized Environmental Notification Service	NF#2, AF#1, AF#2, AF#3, AF#4, AF#5

5G-IANA – Info Day

Conclusion

- Atomic Components and nApps are building blocks to create Vertical Services
- The building blocks can be easily chained together in a graphical way
- In 5G-IANA we provide a set of nApps, called «starter kits» available to use for integrating them into third-party vertical services

Thank you for your attention! Any questions?
